

Simonds International Technical Center (SITC) Training Update

Bandsaw training materials are progressing well and will begin with Swaging and Shaping. All necessary equipment for training on: Safe Handling, Swaging, Shaping, Sharpening, and Benching of bandsaw blades is installed, operational and available for demonstration.

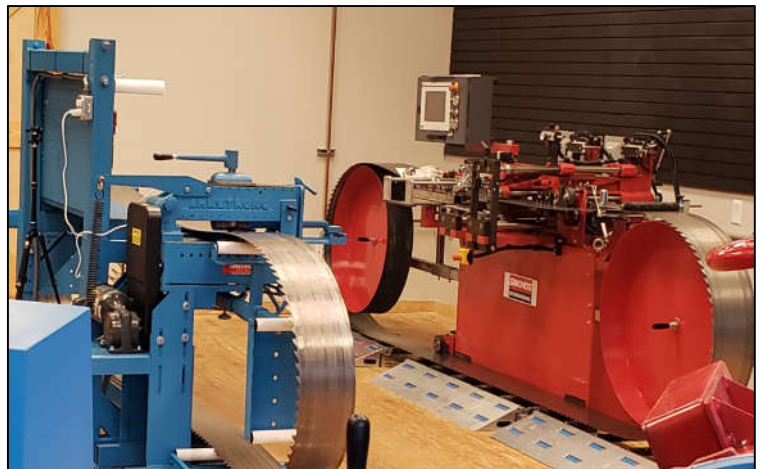

Additional bandsaw investments underway include: sharpening with coolant, stellite tipping, guide block maintenance and coolant systems. Circle saw investments and training will follow.

Equipment showroom is open by appointment only.
1910 N Cashua Dr, Florence, SC

Left Image - Manual Loop. #4 Sharpener with Control Tower and 5' Filing Clamp.
Right Image - Automated Loop. VariSharp with AutoSwage and 3' Filing Clamp.

Left Image - Manual Bench. #81 Bench with welding clamp and #5 Super Duty Stretcher Roll.
Right Image - Automated Bench. 095 AB with dual tension rolls and light curtain shutoff.

Six foot work bench will accommodate several students during tool set up.

Our classroom is adjacent to the equipment showroom to facilitate hands on training.
