

PUTTING THE COMPETITIVE EDGE IN YOUR HANDS.

Super
PRE SHARP

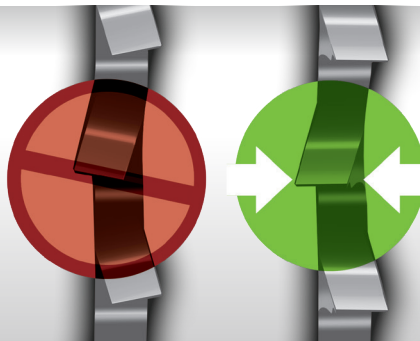

Every operation needs an edge. And you'll get one with Simonds **Super7** (7 degree tooth angle) and **PreSharp™** (10 degree tooth angle) blades, both featuring our unique square-faced edge for optimum tracking and a smooth, clean cut. Invest in your operation, and gain the competitive edge by choosing the blades that outperform the rest.

Local Service & Support with a Global Reputation. Choose Simonds Super7 and PreSharp™.

Super7 is available in 2 widths: 1-1/2" w | 2" w

PreSharp™ is available in 4 widths: 1" OS w | 1-1/4" w | 1-1/2" w | 2" w

Conventional blades channel dust to the side of the blade, increasing dust spillage.

Simonds **Super7** and **PreSharp™** blades have a unique, square-faced cutting edge that:

- Delivers cleaner boards.
- Increases production.
- Puts more \$\$\$ in your pocket.

Invest in your operation by choosing the blades that **outperform the rest.**
